Dear Hiring Manager,

I am writing to express my interest in the Senior Staff Ruby Software Engineer position at Housecall Pro. With over 15 years of experience driving technical vision and architectural leadership across distributed systems serving 35M+ users, I would love the opportunity to help transform your platform architecture.

What draws me to Housecall Pro is how your application addresses real, tangible business problems for home service professionals. Having worked across various industries, I appreciate that your platform directly impacts the daily operations of plumbers, electricians, and other trades professionals. The shift from paperwork to streamlined digital workflows represents genuine value creation, not just technological novelty. This focus on solving actual business challenges aligns with my approach to engineering.

Your platform evolution from monolithic Ruby on Rails to modern, distributed, event driven architecture aligns perfectly with my background. At InMoment, I led cross team architectural decisions for a 7+ microservices platform handling over 1M requests monthly and championed Domain Driven Design principles across development teams. At Tarmac, I coordinated with global teams across four time zones and established engineering standards adopted across multiple client projects.

I bring deep Ruby and Rails expertise combined with modern distributed systems knowledge. My recent work includes evaluating technical trade offs during system migrations and pioneering AI assisted development workflows using Claude Code and GitHub Copilot, improving code quality and development speed by 30%. My entrepreneurial experience founding Qaplus demonstrates my ownership mentality and ability to translate business requirements into scalable technical solutions.

I have extensive experience working with distributed teams across multiple time zones, which translates well to Housecall Pro's remote environment. My approach to team collaboration includes creating Team Working Agreements that have improved velocity by 25% and reduced production incidents by 90%.

I would welcome the opportunity to discuss how my architectural leadership experience can contribute to Housecall Pro's continued growth. Thank you for considering my application.

Best regards,
Pablo Monfort
